An Atlas of Evidence

One map is not one kind of knowledge. Explore population observations, published capital-exclusion models, and an explicitly unmeasured life-support field.

193 UN-member RTLDI records plus Natural Earth cartographic units; the map is not the country register.

Three founding systems contribute reusable contracts, not interchangeable measurements. No upstream analytical model is recomputed.

Web, print, CSV and GeoJSON are built from the same validated input package. No forecast, source refresh or alternate model is silently substituted.

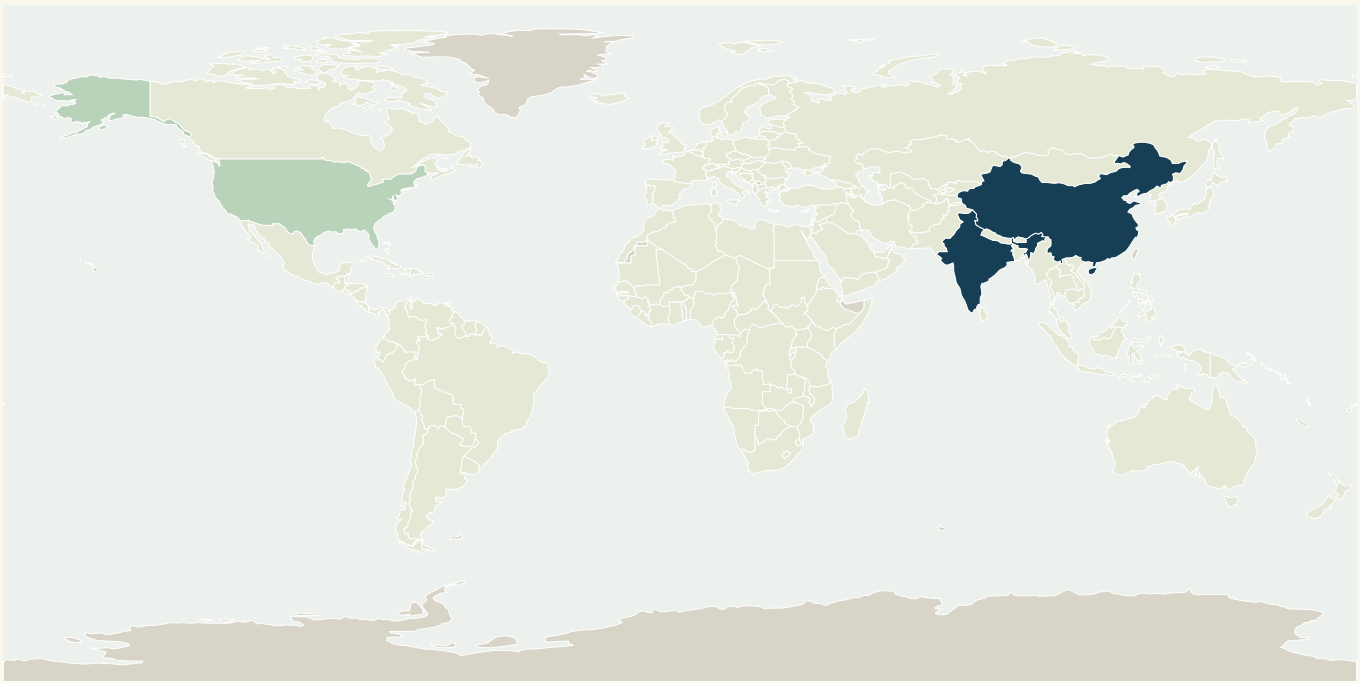

Project owner: Sid J.A. Hubbard · Open Atlas Standard

WEB COMPANION

https://sjah9.github.io/open-atlas-standard/demo/

Population

Equirectangular / WGS84 longitude-latitude / source geometry retained

0 1500000000

Not measured / no record

World Bank / UN total population. Select an actual observed year; absent records stay missing.

Fixed linear color domain: [0, 1500000000]. Missing cells are not zero; model estimates and measurements remain distinct.

Map polygons may not cover every registered entity. The following register preserves those entities rather than omitting them.

composite (0-1) / 2026

Life-support resilience

Equirectangular / WGS84 longitude-latitude / source geometry retained

0 1

Not measured / no record

No composite is available without accepted evidence in all nine domains. The initial founding project has no accepted observations.

Fixed linear color domain: [0, 1]. Missing cells are not zero; model estimates and measurements remain distinct.

Map polygons may not cover every registered entity. The following register preserves those entities rather than omitting them.
